### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng et al. in view of Tolles.

Cheng et al. teaches a method for imparting relative motion to a polishing pad wherein the polishing pad is rotated about a center axis which is perpendicular to the polishing surface of the polishing pad, and dispensing a material to the most center portion of the polishing surface and including the axis, and further dispensing the material from the dispensing arm to the polishing pad all along an area from the circumference of the polishing pad to the axis, (col. 7, lines 14-45). Cheng et al. teaches all the limitations of the claims except for the material being a wash solution comprising de-ionized water. Tolles teaches dispensing a slurry or wash solution comprising de-ionized water on a polishing pad, (col. 8, lines 31-32). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the invention of Cheng et al. with the a wash solution comprising de-ionized water, as taught by Tolles in order to enhance the pad cleaning capabilities, and since it is known in the art that a slurry dispense arm is capable to dispense either a slurry or a wash solution.

***Allowable Subject Matter***

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-11 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 12 and 14 have been considered but are moot in view of the new ground(s) of rejection.
